Press Release

April 5, 2007

**Winchester Business Systems to
Exhibit at the DIA Annual Meeting 2007**

Winchester, a leader in providing software business solutions primarily to the pharmaceutical, biopharmaceutical, and medical device industries worldwide, will exhibit at the 43rd Annual Meeting of the Drug Information Association (DIA) at the Georgia World Congress Center, Atlanta, GA June 17 – 20 in booth 2229. More details on the DIA can be found at www.diahome.org.

Solutions demonstrated include: Protocol Manager, a CTMS; ParaFILE, an EDMS; adWatch-AE for adverse event reporting; and ComPaq GxP for integrated 21 CFR Part 11 compliance. Protocol Manager is a full-scope, configurable, off-the-shelf Clinical Trials Management System (CTMS). Protocol Manager helps clinical operations manage global trials of drugs, devices, biologics, and vaccines in all phases of development. ParaFILE is an Electronic Document Management system (EDMS) that can be tailored to fit your enterprise and each departmentally different EDM requirement. AdWatch-AE helps pharmaceutical organizations manage and report adverse events that occur during clinical trials.

These programs, and others from Winchester, have been installed at locations worldwide to help clinical R&D bring drugs and devices to market faster.

To arrange a personal demonstration and meet key Winchester personnel, call 781 503 0200, email sales@wbsnet.com or stop by booth 2229 while you are in Atlanta.

Founded in 1989, Winchester Business Systems, Inc. is a leader in providing software business solutions to the pharmaceutical, biopharmaceutical, and medical device industries. As an Advanced Industry-Optimized Business Partner for IBM, Winchester combines its knowledge of industry clinical practices with the application of IBM's collaborative technology to these areas.
